Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)					
Office Action Summany	10/600,919	FURUKAWA ET AL.					
Office Action Summary	Examiner	Art Unit					
	VINH P. NGUYEN	2829					
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the co	orrespondence address					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2829

1. Claims 2-3 are objected to because of the following informalities:

In claim 2, it is unclear what "means for changing a signal level" and what does it comprise. Furthermore, "said power source unit" has no antecedent basis.

In claim 3, it is unclear what "means for changing a frequency of said overlaid signal" and what does it comprise. Furthermore, "said power source unit" has no antecedent basis.

Appropriate correction is required.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the features of "means for changing a signal level" as recited in claim 2, "means for changing a frequency of said overlaid signal" as recited in claim 3 and "said electronic device comprises a plurality of semiconductor devices" as recited in claim 8 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement

Application/Control Number: 10/600,919

Art Unit: 2829

Page 3

Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

- 3. Claims 1 and 4-8 are allowable because the prior art does not disclose an LSI testing apparatus for testing an electric device having means for overlaying an overlaid is signal with a predetermined period on a source voltage supplied to the electronic device as recited in claim 1. Since claims 4-8 depends from claim 1, these claims are also allowed.
- 4. Applicant's arguments filed on have been fully considered but they are not persuasive. 04/12/05.

Applicants' remark about the support for "means for changing the signal level of the overlaid signals" found on page 18, lines 2-15 is not persuasive because it is still unclear which part of the power source unit (20) would include "means for changing the signal level of the overlaid signals". Both power source (24) and random waveform generating unit (22) does not qualified for "means for changing the signal level of the overlaid signals since their functions are different.

Application/Control Number: 10/600,919

Art Unit: 2829

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Page 4

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to VINH P. NGUYEN whose telephone number is (571)-272-1964. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications
